POWDER DETERGENTS

IBERCOMPOUND is one of the few international companies specialized in the manufacture of powder detergents for vehicle washing.

Our experience has led us to develop very innovative products and offer different alternatives to the current range, with a very uniform granulometry, high solubility, great cleaning power and adaptation to different dosing systems.

Powdered detergents manufactured by IBERCOMPOUND have the following properties:

Suitable for any dosing system

Granulometry
Very uniform (avoid falling through the dispenser when it is not being used)

Very low volatility
They facilitate its use in technical rooms and closed spaces

Good effect WETTER
Easily removes static dirt from FILM TRAFFIC

Good ADHERENCE
of the product on the surface of the vehicle

Excellent SOLUBILIZATION POWER of the dirt

High solubility They dissolve easily, avoiding the clogging of the filters and the wear of the pumps

Great cleaning power and high degreasing power

Wide PROTECTION against corrosion of materials, due to its specific anticorrosive components

Respectful behavior with plastics, moldings and glasses

***IBERCOMPOUND
presents a very wide range
of products adapted to all
needs:***

Without phosphates and with phosphates.

Of greater or lesser foaming effect.

High alkalinity or controlled alkalinity.

Wide range of densities.

Great variety of fragrances.

Different ranges of colors

Different packaging formats.

Possibility of personalized products as soon as

color, aroma, label, packaging ...

Different quality-price relationships.

Specific products for each type of dosing system.

POWDER DETERGENTS FOR CAR WASHING
